Education

KJ Somaiya College of Engineering, Mumbai *Pursuing Bachelors of Technology in Information Technology* *October 2022 – May 2026*

- CGPA: 8.2 ([🔗](#))
- **Coursework:** Data Structure and Algorithms, Competitive Programming, Information and Security, UI Programming

Experience

Software Developer *In-house internship* *Sept 2024 - Jan 2025*

- Developed a web platform for eighth-semester students to manage and submit their sem long internship work online, reducing workload for both faculty and students.
- Implemented features for online exam conduction and grading based on student submissions, enhancing administrative efficiency.
- Built using the MERN stack (MongoDB, Express.js, React, Node.js), ensuring scalability and performance of the platform.

Software Developer *In-house internship* *Dec 2023 - March 2024*

- Developed a clothing website, "Skarp," focused on Gen Z fashion trends.
- Introduced a unique feature allowing users to upload custom images or logos for printing on hoodies, shirts, and other clothing items.
- Designed and implemented the website using pure HTML and CSS, ensuring a clean and responsive user interface.

Projects

SKARP - Gen Z Clothing Website [SKARP](#) [🔗](#)

- Developed a clothing website, "Skarp," focused on Gen Z fashion trends with a unique feature allowing users to upload custom images or logos for printing on clothing items like hoodies and shirts.
- Designed and implemented the website using pure HTML and CSS, ensuring a clean, modern, and responsive user interface.
- Tools Used: HTML, CSS

Train Ticket Booking Website [Train-booking](#) [🔗](#)

- Developed a basic train ticket booking system inspired by local train booking systems with interactive maps.
- Users can book tickets easily by selecting their desired stations from the map, simplifying the booking process.
- Tools Used: HTML, CSS, PHP

Somaiya Internship Portal [sli-kjsce.somaiya.edu](#) [🔗](#)

- Developed an internship portal for KJ Somaiya College to facilitate internship applications and management for students in their 8th semester.
- Integrated Google authentication for secure login using college email accounts.
- Tools Used: MERN Stack (MongoDB, Express.js, React, Node.js), Google Authentication
